

# Terminal DE

## Philadelphia International Airport

**DAROFFDESIGN**

DDI was the “prime” provider for the master planning, architecture, interior design, environmental graphic design and consulting engineering services for the \$350 million dollar, 372,000 square foot Terminal D/E renovation and expansion project. This project included new and expanded land side facilities, connecting concourses and bridges, a new hammerhead air side facility, a 14 lane security screening checkpoint, state of the art (high security) baggage handling facility, an off-site thermal plant, Division of Aviation executive and operational offices and a concourse “mall” accommodating 25 new retail and restaurant tenants.
